**Evaluating Effectiveness of Global Software Development  
Using the eXtreme Programming Development Framework  
(XPDF)**

# Problem

---

- Does eXtreme Programming work as a development methodology in a global software development environment?
- Primary problem is finding people who are using eXtreme Programming in this way who are prepared to be involved in this research.

# Approach/Solution

---

- eXtreme Programming Development Framework evaluates the effectiveness of XP when used remotely with Qualitative and Quantitative research strategies.
- This allows the evaluation of the development to be evaluated in an agile and unobtrusive way, adding little extra to the participants workload.
- This research is still in the early stages and few lessons have yet been learned.
